**PROGRAM ACCOUNT/PROGRAM OPTION**

**2010-2011 COMMUNITY ASSESSMENT**

## **2010-2011 COMMUNITY ASSESSMENT**

### **Introduction**

All of the seven (7) Southwest rural counties served by our Head Start Program have per capita incomes and educational levels which are comparable or slightly above the averages for Tennessee and for the United States.

This Community Assessment will serve as a collection of some of the most reliable and recent data available concerning our community. It will offer a systematic analysis of this information, which will help our program to determine how to best serve Head Start and potential Head Start families. As a vital part of our program planning process, the findings based on the Community Assessment will be the basis for program choices and options that are allowed in the Head Start model.
